## BT Go Headphones

- Unique memory wire design
- Superior feel and secure fit
- Powerful 8 hour battery life
- Graphene drivers
- BT version 5
- Comfort auto fit

**Who is it for?**  
We made it super light weight which means its super comfortable.  
The perfect fit means comfort for everyday use.  
The titanium memory wire keeps the buds in your ears at all times so its perfect for running, workouts and sports.

**What is it?**  
Wraps GO is unique next generation V5 bluetooth headphone.  
Its special because it is made with a titanium memory wire that pushes the buds into your ears.  
When you are not listening to them you can store them on your wrist or bag strap.

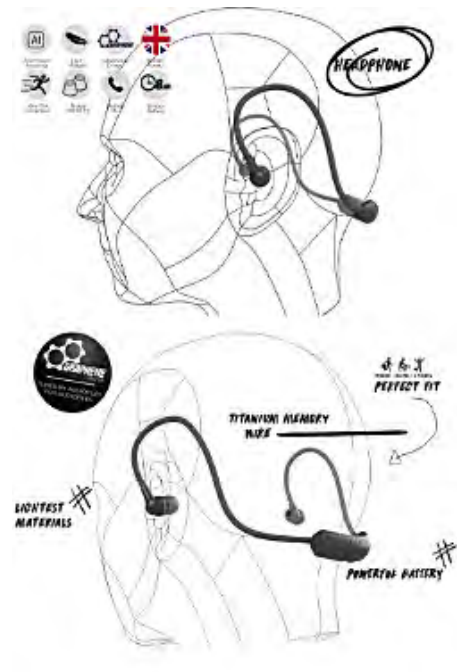

**Why did we make it?**  
We made them for everyone, not just sports.  
We see a gap in the market for lightweight headphone that do not fall out your ears.  
We didn't want the bulk or the wires from a round neck bluetooth headphone.  
We wanted all this and a good sound for a realistic price with added storage features.  
We made it because we wanted it and know you will too.

**Why is it good?**  
It has graphene drivers, one of the best and lightest materials for making headphone speakers, google it!  
We've been making speakers for 25 years, based in Britain we design and tune everything here in our lab in the UK.  
Its unique, theres no headphone like this in the world. It sits in between TWS (AirPod) style headphones and BT neck headphones.  
Its better than both because they dont fall out or flap around on your neck.

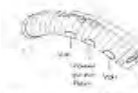

They never EVER fall out

Speed fit, from head to wrist in seconds

## CARAVAN & CAMPER DRAINAGE KIT

Wenn Sie einen Wohnwagen oder ein Wohnmobil mit einem nicht abschaltbaren Wasserspeicher an Bord haben, dann ist dies das Combo-Kit für Ihre Bedürfnisse.

Gewinner des Practical Caravan's Caravan Accessory of the Year 2012, unser Floë System ist eine einfache Möglichkeit, Ihren Wohnwagen oder Camper zu entleeren, um Platz für herrlich frisches Trinkwasser zu schaffen, oder als Vorbereitung für die kalten Winterfröste.

Floë wurde von der University of Ulster getestet und hat wissenschaftlich bewiesen, dass es mehr als 99,9 % des abgestandenen Wassers, der Bakterien und des Biofilms entfernt, so dass Ihr System frisch und leer für jede Reise ist (siehe Frischwasser-Floë). Es hat sich auch bei Winterfrost bewährt, um die komplizierten Komponenten Ihres Wassersystems wie Ihre Pumpe, den Wasserfilter, die Dusche und die Kunststoffarmaturen zu schützen (siehe Better Cash Floë).

Mit seiner patentierten Technologie schnappen und klicken Sie dieses Floë-Kit einfach neben Ihren Frischwassertank und mit Hilfe einer Fußpumpe oder eines 12-Volt-Reifencompressors können Sie das Wasser aus jedem Wasserhahn und jeder Armatur herausspülen und wissen so, dass Ihr System leer ist.

### **KALLE** DER SPORTLICHE E-SCOOTER

#### **Verbesserte Reichweite**

Kalle ist jetzt mit einem hochwertigen Hobbywing Controller ausgerüstet. Durch das optimale Zusammenspiel der Komponenten erreichen wir 20% mehr Reichweite als vorher. Bei unseren Tests mit 75 kg Fahrergewicht unter Vollgas wurde eine Reichweite von 30,6 km geschafft. Das entspricht der Reichweite, die wir mit dem 10.4 Ah Akku vorher erzielt haben.

#### **NEUES Licht**

Wir haben ein Upgrade auf die deutlich hellere Frontleuchte von PAUL vorgenommen. Die 30 Lux starke Lampe sorgt dafür, dass du bis zu 35 Meter beleuchtete Fahrbahn vor dir hast.

### **Trittbrett** DER E-SCOOTER

#### **Höhere Sicherheit**

Für größtmögliche Stabilität haben wir das Ver- schlussgelenk und die Form der Frontstange von PAUL auf Kalle übertragen und uns bei der Fertigung an Methoden aus Luft- und Raumfahrt bedient. Dadurch haben wir eine hohe Steifigkeit und ein verbessertes Gefühl beim Verschließen des Klappmechanismus erreicht.

#### **Feinfühligere Motorbremse**

Wir haben die on/off Motorbremse gegen die weiterentwickelte E-ABS Bremse von PAUL getauscht. Dadurch erreichen wir ein angenehmes Bremsverhalten bei voller Bremskraft.

## PERSONAL AIR QUALITY COACH – ATMOTUBE PRO

# ATMO<sup>®</sup> TUBE

**PRO**

Our most advanced solution for both indoor and outdoor air quality tracking. It detects PM1, PM2.5, and PM10 pollutants, such as dust, pollen, soot, and mold spores. It can also measure VOCs concentration, atmospheric pressure, temperature, and humidity - all in real time!

### How it works

The sensors inside Atmotube keep constant track of air parameters and send the data to your mobile phone via Bluetooth Low Energy (LE).

The Atmotube mobile app is free and available for iOS 9 and Android 4.3+ smartphones with Bluetooth LE support.

If the air quality gets below certain point, you will immediately receive an alert notification.

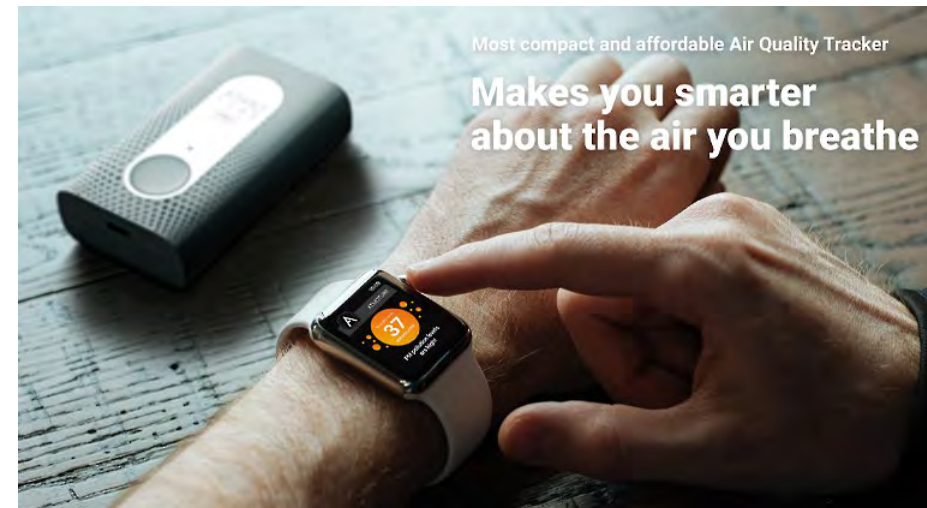

You can access all your measurements, an air quality map, and your personal air score from your mobile phone, which will help you to make the right choices and live healthier.

For PM1, PM2.5, and PM10, readings on Atmotube Pro just press the button one time to start measuring the (PM1, PM2.5, PM10) pollution.

## ACTIVE NOISE CANCELLING EARPLUGS

## Technologie

Die Geräusche in Flugkabinen liegen bei etwa 100Hz. Bei dieser Frequenz versagen alle passiven Ohrstöpsel. Sie wirken zwar breitbandig, decken aber niedrige Frequenzen nicht ab. QuietOn vereint beide Eigenschaften. Sowohl die passive breitbandige Lärmunterdrückung als auch die aktive Lärmunterdrückung im niedrigen Frequenzbereich.

### Ursprünge in der NASA, perfektioniert von ActivePure

Die Basis der ActivePure® Technologie wurde in den 1990er Jahren von der NASA für das Space Shuttle geschaffen. Fortschritte in der Technologie haben die Effizienz ohne Verwendung von Ozon (O3) erhöht. Für diese Fortschritte wurden die Produkte als Certified Space Technology bezeichnet und sind eine von nur 75 Technologien, die in den letzten 30 Jahren in die Space Technology Hall of Fame aufgenommen wurden. Basierend auf aktiven Prozessen, die in der Natur vorkommen, ist die proaktive Pathogenabwehr das einzige ungiftige, von der FDA zugelassene System, das die Luft kontinuierlich reinigt und für Mensch und Tier sicher inhaliert werden kann.

Der proaktive Erregerschutz wurde sofort von Krankenhäusern für den Einsatz in Operationssälen und Akutziimmern übernommen. Es war von Anfang an bekannt, dass diese ActivePure-Technologie Tausende von Leben retten könnte. Es ist jetzt für jedes Zuhause, jedes Geschäft und jeden öffentlichen Raum in Amerika und Europa verfügbar.

Die seit langem bekannte desinfizierende Wirkung (Oberflächen, Trinkwasser, Luft) von UV-C Strahlen setzen wir hier als Lösung des Problems der Aerosole in geschlossenen Räumen ein. In einem geschlossenen System wird die Raumluft an einer entsprechenden UV-C Strahlungsquelle vorbei geleitet.

Die Raumluft wird zusätzlich noch über Filter der Klasse G3 geführt. Da direkte UV-C Strahlung gesundheitsschädlich ist, ist die UV-Röhre in einem gekapselten System untergebracht, welches keinen Austritt nach außen zulässt.

Dies gewährleistet einen sicheren und dauerhaften Betrieb auch bei Anwesenheit von Personen. Als Einsatzgebiete sind insbesondere Klassen, Tagungs und Büroräume zu nennen.

## Air2Color Luftqualitätsmesser mit CO2-Ampel

### GESUND UND LEISTUNGSFÄHIG DURCH OPTIMALE LUFTQUALITÄT

Faszinierendes Design kombiniert mit hochwertiger Messtechnik für exakte und zuverlässige Werte auf einen Blick.

Der AIR2COLOR PRO bewertet die 4 wichtigsten Indikatoren der Luftqualität: CO<sub>2</sub>-Gehalt, Feinstaub, Luftfeuchtigkeit und Temperatur - für Ihre Gesundheit. Das Gerät misst mit 3 hochsensiblen Sensoren präzise und kontinuierlich alle Werte und gibt Ihnen diese übersichtlich auf dem Touch-Display wieder. Der CO<sub>2</sub>-Gehalt wird zusätzlich über einen Leuchtbalken, der von allen Seiten gut sichtbar ist, in den leicht verständlichen Ampelfarben Grün, Gelb und Rot angezeigt.

#### CO<sub>2</sub>

Der Kohlendioxid (CO<sub>2</sub>)-Gehalt der Luft ist ein Indikator für verbrauchte Luft in Innenräumen. Je höher der CO<sub>2</sub>-Gehalt, desto geringer ist der Sauerstoff-Gehalt. Konzentrations- und Leistungsfähigkeit lassen nach. Außerdem weist dies auf eine hohe Aerosolkonzentration im Raum hin, welche die Ansteckungsgefahr durch Viren begünstigen kann.

Der AIR2COLOR PRO nimmt eine exakte Messung des CO<sub>2</sub>-Wertes vor. Bei Bedarf fordert er Sie mit der Ampelfunktion zum effizienten Lüften auf. Frische Luft im Raum steigert Ihre Konzentrationsfähigkeit, stärkt das Immunsystem und gibt Ihnen ein gutes Gefühl.

CO<sub>2</sub> < 1000 ppm  
Luft ist frisch

CO<sub>2</sub> > 1000 ppm  
Lüften empfohlen

CO<sub>2</sub> > 1500 ppm  
Luft ist stauend

CO<sub>2</sub> > 2000 ppm  
Lüften dringend erforderlich

Zwei verschiedene Leuchtbalken im Lieferumfang enthalten

- geeignet für Büros, Besprechungsräume, öffentliche Einrichtungen und für Ihr Zuhause (max. 80 m<sup>2</sup>)

#### FEINSTAUB

Das Thema Feinstaub und die damit häufig verbundenen gesundheitlichen Gefahren in unserem Alltag werden noch immer unterschätzt. Der hochempfindliche Sensor misst Feinstaub-Partikelgrößen von 0,4 – 10 µm, diese werden unterschiedlichen PM-Werten (1.0, 2.5, 4 und 10) zugeordnet. Dieser Messbereich umfasst die Partikelgröße von kleinsten, lungenschädlichen Partikeln bis hin zu feinem Hausstaub.

Der AIR2COLOR PRO ermöglicht so eine umfassende Bewertung der Feinstaubbelastung der Umgebungsluft. Die präzisen Messergebnisse werden Ihnen auf dem Farbdisplay angezeigt und bewertet.

#### LUFTFEUCHTIGKEIT

Eine zu niedrige Luftfeuchtigkeit verursacht häufig trockene Haut und kann sich negativ auf Ihre Schleimhäute auswirken. Viren und Bakterien bekommen so einen leichteren Zugang zum Körper. Die optimale Luftfeuchtigkeit in Innenräumen liegt bei 40-60% und erhöht laut Experten die Verträglichkeit bei Feinstaubbelastungen. Eine zu hohe Luftfeuchtigkeit kann jedoch zu Schimmelbildung führen und damit z.B. zu Allergien und Asthma.

Der AIR2COLOR PRO zeigt die aktuelle Luftfeuchtigkeit an und gibt Ihnen so eine Hilfestellung, um für optimale Werte in Ihren Räumlichkeiten zu sorgen.

#### TEMPERATUR

Experten empfehlen eine Temperatur am Arbeitsplatz von knapp unter 20° Grad, im Wohnbereich jedoch etwas wärmer.

Über das Display des AIR2COLOR PRO behalten Sie die Raumtemperatur jederzeit im Auge.

Die fortschrittliche Technologie von Diamond Defense erzeugt eine starke, hydrophobe, nano-dünne Beschichtung auf dem Screen, die nicht gesehen oder gefühlt werden kann.
